GraVoc Associates, Inc.

- Founded in 1994
- Located in Peabody, MA
- Organized into 4 Practices
- Information Security Practice:
  1) Risk Management & Compliance
  2) IT Assurance
  3) IT Audit

GRAVOC ASSOCIATES

Today's Agenda

- Introduction
- Demonstration/Show & Tell
- Recommendations
- Question/Answer & Closing Remarks

Projected size of the global market for RFID tags from 2010 to 2020 (in billion U.S. dollars)

This statistic represents the market size for RFID tags from 2010 to 2012, and gives a projection through 2020. In 2010, the global market for RFID tags was sized at around 5.6 billion U.S. dollars.

Show more

Introduction: RFID Basics

Frequencies:

1. Low (LF)
2. High (HF)
3. Ultra-High (UHF)

Fun fact: Between 70-80% of all physical access RFID devices in US use low frequency.

GRAVOC ASSOCIATES

Introduction: RFID Basics

Not so fun fact: Low frequency RFID has been hacked and is insecure.

GRAVOC ASSOCIATES

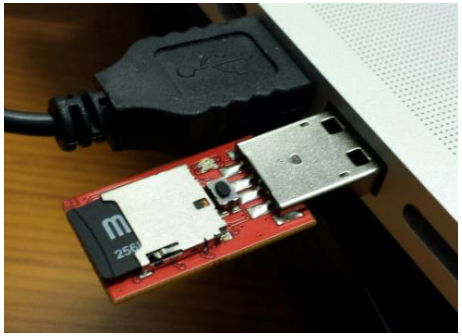

Video Demonstration: Summary

1. Passively steal RFID keycard data.

2. Create card with stolen data.

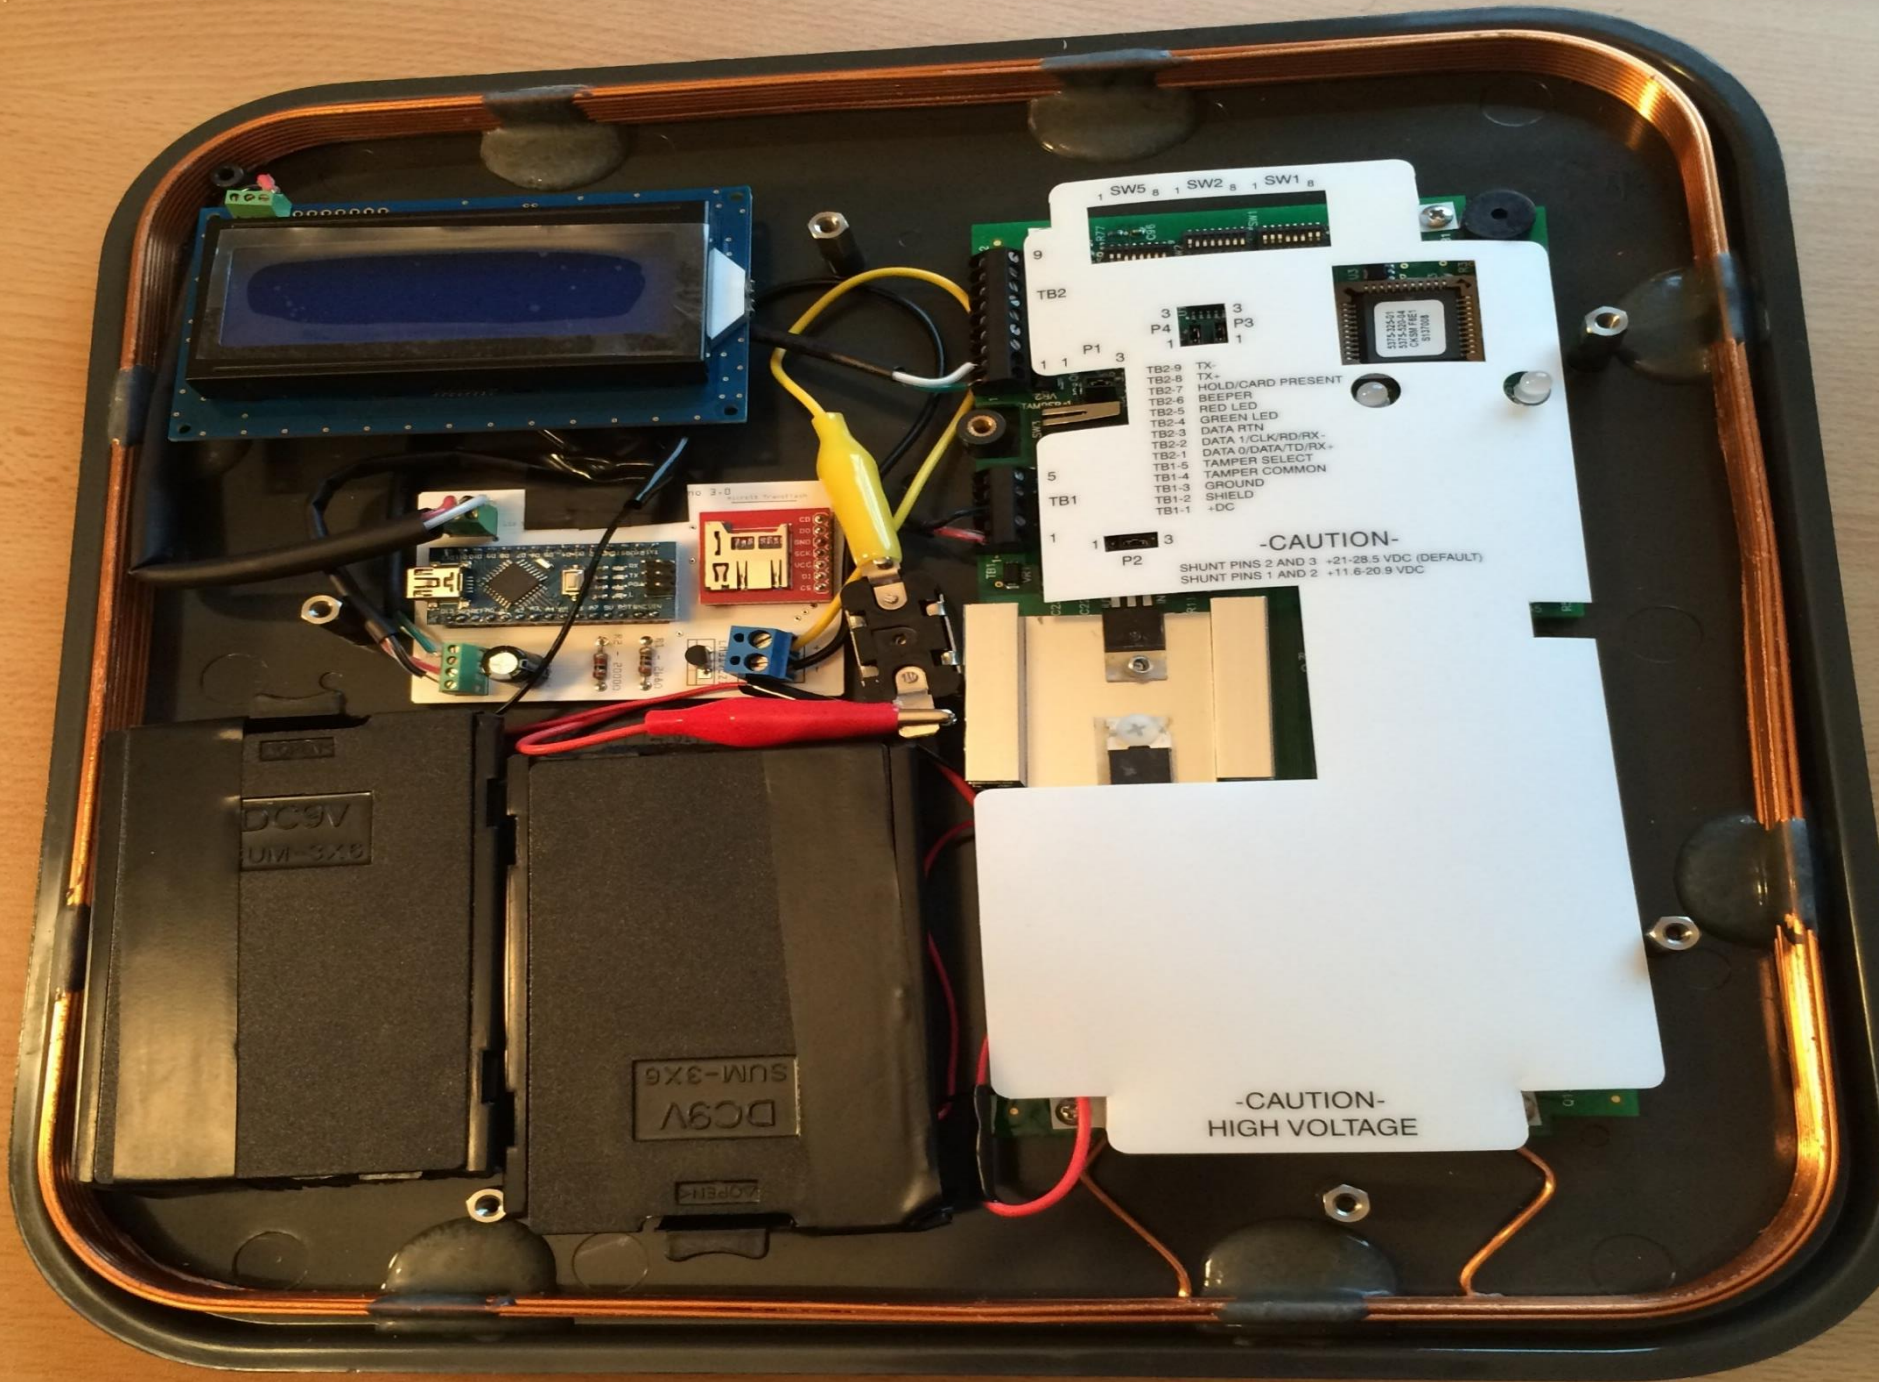

3. Gain entry and execute exploit.

GRAVOC ASSOCIATES

Video Demonstration: Tools

- **Tastic RFID Thief**
  Sniff card data and store to SD card
- **Proxmark3**
  Copy RFID card
- **Rubber Ducky**
  USB to bypass antivirus and gather credentials
- **Mimikatz**
  Software that extracts Windows passwords

payload generator.

Carry multiple payloads, each on its own micro SD card.

Load

the micro SD card into the ducky then place

Deploy

the ducky on any target Windows, Mac and Linux machine and watch as your

s in mere seconds.

Video Demonstration: RFIDecoder

Disclaimer: **This video was created for educational purposes only. No illegal entry or data compromise occurred during the making of this video.**

GRAVOC ASSOCIATES

Next Steps (for an attacker)…

1. Introduce a USB device that automatically dumps Windows passwords (Rubber Ducky)
2. Bypass antivirus using procmon (developed by Microsoft) to gather system memory and later extract Windows passwords in cleartext (Mimikatz)
3. Plant malicious device/backdoor to extract data to remote location (Raspberry Pi)

Recommendations

Use RFID shield wallet cards

Do not wear RFID card in plain view (if your ID card is an RFID card, consider using two separate cards)

GRAVOC ASSOCIATES

Recommendations

Monitor access with cameras

Use a two-factor authentication
(RFID + keypad, lock/key, etc.)

GRAVOC ASSOCIATES

Recommendations

Upgrade RFID systems to use more secure protocols (i.e. higher frequency)

Enhance testing methodologies to incorporate physical security with vulnerability assessments and social engineering

GRAVOC ASSOCIATES

Recommendations

Disable USB ports and create a whitelist of approved devices

Monitor all log files

GRAVOC ASSOCIATES

Closing Remarks

"**Don't forget physical security.** Not all data thefts happen online. Criminals will tamper with computers or payment terminals or steal boxes of printouts."

Executive Summary to 2014 Data Breach Investigations Report
Verizon

GRAVOC ASSOCIATES

Closing Remarks

"To be sure, RFID is still widely used in retail and shipping today. It's even at the heart of near field communication — the technology that powers Apple Pay and other contact-less payment systems."

Before Apple Pay, There Was That Thing Called RFID
